

Project Manager, Health Economics and Outcomes Research

We are an independent consultancy in beautiful Vancouver British Columbia, specializing in epidemiology and health economics, with a particular focus on creating customized solutions to best meet our clients' diverse needs. Our team comprises epidemiologists, health economists, statisticians, and IT specialists. Our projects are led by senior team-members with extensive experience across a wide range of HEOR studies. We have an extensive network of external academic and clinical experts who collaborate on studies that lie within their core areas of expertise. We are looking to hire an experienced Project Manager to lead projects and mentor staff.

Responsibilities:

- Epidemiological study design
- Contributing to epidemiologic and economic models
- Scientific writing
- Statistical analysis (dependent on experience and training)
- Conducting systematic literature review and evidence synthesis projects
- Leading client communications
- Managing time, budget, and allocated resources on projects
- Mentoring junior team members

Education:

- MSc or PhD in Epidemiology, Health Economics, Statistics, Biostatistics, or Public Health, or equivalent experience

Experience:

- 5+ years of experience managing health research projects in a consultancy or academic capacity.
- Strong independent working skills
- Managerial, leadership and project management skills - Excellent oral and written communication
- Organizational, multi-tasking and problem solving skills, with the ability to work independently within a team environment as well as the ability to work under pressure to meet deadlines
- Proficiency with Microsoft Outlook, Excel, Word, PowerPoint is required, as well as familiarity with at least one statistical package.
