

Research Analyst, Health Economics and Outcomes Research (HEOR)

We are an independent consultancy in Vancouver British Columbia, specializing in epidemiology and health economics, with a particular focus on creating customized solutions to best meet our clients' diverse needs. Our team comprises epidemiologists, health economists, statisticians, and IT specialists. Our projects are led by senior team-members with extensive experience across a wide range of HEOR studies. We have an extensive network of external academic and clinical experts who collaborate on studies that lie within their core areas of expertise. We are looking to hire an experienced research analyst to support a wide variety of health economic and epidemiologic research projects.

Responsibilities include:

- General research support
- Contributing to
 - Epidemiologic study design and models
 - Economic models
 - Statistical analysis and data visualization (dependent on experience and training)
 - Systematic literature review and evidence synthesis projects
- Scientific writing
- Assisting with client communications

Education:

- MSc or PhD in Epidemiology, Health Economics, Statistics, Biostatistics, or Public Health, or equivalent experience

Experience:

- 2+ years of health research experience in a consultancy or academic capacity.
- Strong independent working skills
- Organizational, multi-tasking and problem-solving skills, with the ability to work independently within a team environment as well as the ability to work under pressure to meet deadlines
- Proficiency with Microsoft Outlook, Excel, Word, PowerPoint is required; familiarity with a statistical or data visualization package would be an advantage.

To apply please send a cover letter and resume to info@broadstreetheor.com
